Full-stack developer with 2+ years of experience, comfortable across frontend/mobile and backend. I build products that solve real problems — from mining traceability with physical hardware to payment platforms in production. Co-founder of **ChronoSoft**, and currently pursuing a Systems Engineering degree at ITM. Clean code, good UX, measurable impact.

EXPERIENCE

Sun Valley Investments

JUN 2025 — PRESENT

Full-Stack Developer

- Build **AURUM** end to end (frontend + backend): a mining traceability platform used by **50+ users** with full visibility over gold processing.
- Integrated physical peripherals — printers, truck scales and mining elevators — to capture operational data in real time.
- Automated purchasing and assay workflows, saving **2 h/day for 10+ people**.
- RBAC authentication and WebSockets bridging hardware and backend.

Coins Tech Colombia

APR 2024 — JUN 2025

Full-Stack Developer

- Built a parking platform now in production, processing **100–200 transactions daily**.
- Integrated Wompi payments for real-time transactions.
- Led a **design system** for operations and admin apps, improving consistency and usability across 10+ interfaces.
- Optimized performance and assets to cut load times; backend on AWS.
